HDLA 206

Dual 6" Ultra Compact Line Array System

Introducing our Dual 6-Inch Ultra Compact Line Array HDLA206 with 320-Watt Power , housed in a sturdy multilayered plywood enclosure. This exceptional line array system is designed to deliver high-quality sound reproduction in a compact form factor, making it ideal for venues where space is limited but uncompromising audio performance is desired.

At the heart of this line array system are two 6-inch drivers, engineered to produce clear, detailed audio across a wide frequency range. Despite their compact size, these drivers are capable of delivering powerful and dynamic sound, ensuring an immersive listening experience for both small and mid-sized venues.

With a total power output of 320 watts, this line array system has ample headroom to fill the space with rich and balanced sound. Whether you're setting up for a live performance, conference, or DJ event, this system can handle the demands of various applications with ease.

The multilayered plywood enclosure offers superior durability and acoustic performance. The carefully selected plywood materials and construction techniques result in a rigid and resonance-free cabinet, minimizing unwanted vibrations and enhancing sound clarity. This ensures that the audio output remains pristine and free from distortion, even at high volume levels. To further enhance the reliability and aesthetics of the system, the line array comes with aluminum accessories. These components not only provide structural integrity but also add a touch of sleek elegance to the overall design.

In summary, our Dual 6-Inch Ultra Compact Line Array with 320-Watt Power and Aluminum Accessories is a versatile and high-performance audio solution. Its compact size, powerful output, multilayered plywood enclosure, and aluminum accessories make it an excellent choice for venues where space is limited, without compromising on audio quality or durability. Experience pristine sound reproduction and impressive coverage with this exceptional line array system

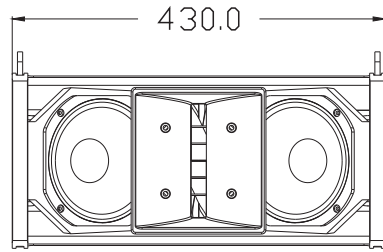

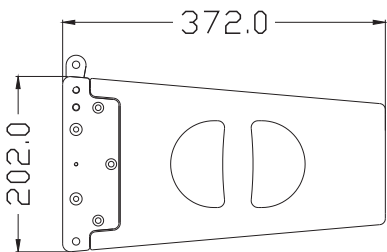

HDLA 206

Dual 6" Ultra Compact Line Array System

FEATURES

- High quality plywood with wear resistant and waterproof polyurea paint
- LF and HF for Exceptional sound quality, powerful response & long throw.
- High grade & durable cabinet design.
- True 100°(-6dB) horizontal mid and HF pattern control.
- High power SPL 118dB, 124dB Peak.
- High-quality passive crossover network for maximum reliability.
- Extra textured anti-scratch paint finish.
- Aluminum Alloy hanging system, convenient for hanging and stacking
- Easy carry handles & heavy duty protective grille.

Technical Specifications

Design	Dual 6" Ultra compact Line Array
Components	2X6" (150mm)/1.5" voice coil LF driver 1x1" (25mm)/ 1.7" voice coil HF driver
Power (RMS)	320W
Max Power	1280W
Sensitivity	96dB 1watt/1Metre
Impedance	16 ohms
Max SPL	124dB
Frequency Response	LF: 90Hz- 18kHz
Connector	2x 4-pole SpeakON
Crossover	1.1kHz Passive
Dispersion (-6dB)	Horizontal Coverage: 100° Vertical Coverage: varies, Depending on array length and configuration
Dimensions	(W)430mmX(D)202mmX(H)372mm
Weight	12 KGS
